Project Experience

Cardiac Arrhythmia Prediction

Pune
03/2023 - 06/2023

The Cardiac Arrhythmia Prediction project is a Python-based application designed to detect and predict cardiac arrhythmia diseases. This project involves leveraging machine learning techniques to analyze electrocardiogram (ECG) data and identify irregular heart rhythms indicative of arrhythmias.

· Dataset training and Dataset Identification
· Used API ,Mysql,HTML,CSS,Bootstrap,Python.

Currency Converter

Pune
01/2023 - 03/202

The Currency Converter in Java is a program designed to convert one currency value to another based on the current exchange rates. It typically involves fetching exchange rate data from external sources like APIs, processing user input (such as the amount to be converted and the currencies involved), performing the conversion calculation, and displaying the result.

- Java-based currency converter utilizing real-time exchange rates.
- User-friendly interface for seamless conversion between multiple currencies.
- Integration with external APIs for accurate and up-to-date currency conversion rates.

Extra Curricular
